About R Best, LLC

R Best is a veteran alternative investment manager dedicated to developing systematic investment strategies to measurably enhance our clients' broader portfolios.

Objectives

- Superior Risk-Adjusted Returns
- Low correlation to traditional and equity/credit-based alternatives

The R Best Private Client Program utilizes short term, systematic technical models to capitalize on directional moves in the Treasury and Equity Futures markets. Our models are designed to establish *intraday* trading positions when the markets exhibit a high probability of developing a sustained trending move or a sustained reversion move that day. The programs use machine learning to intelligently select profitable opportunity, and use specific profit targets and stops to limit market exposure. Proprietary indicators and strict risk management policies reduce trading in volatile conditions to protect capital. All trades are liquidated by the end of each trading day.

Program Specifications

Program targets 10% Annualized Volatility | Program averages 0.7% of AUM risk per trade | Maximum margin/equity of 20% per trade

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS. TRADING FUTURES AND OPTIONS INVOLVES SUBSTANTIAL RISK OF LOSS AND IS NOT SUITABLE FOR ALL INVESTORS. AN INVESTOR COULD POTENTIALLY LOSE MORE THAN THE INITIAL INVESTMENT. AN INVESTOR MUST READ AND UNDERSTAND THE COMMODITY TRADING ADVISORS CURRENT DISCLOSURE DOCUMENT BEFORE INVESTING. THIS MATTER IS INTENDED AS A SOLICITATION TO INVEST IN MANAGED FUTURES.

As prescribed by the U.S. CFTC, unless otherwise noted performance is based on the actual net trading results of all accounts.(1)(2) These rates of return are inclusive of all trading-related income and expenses since August 2015. Adjustments for additions and withdrawals are made using the Time-Weighted Method as allowed by the CFTC.

(1) When calculating the yearly rate of return the Advisor resets the nominal value at the beginning of each month and as a result the yearly return is computed as an addition of all months and is not compounded.

(2) Calculations are based on monthly data beginning August 2015 to the most recent available month unless otherwise noted.

(3) Data sources for R Best Performance Statistics and benchmark indices include BarclayHedge, Newedge, S&P, and MSCI World, and were chosen based on style class representation, accessibility and industry recognition. When evaluating the information found on this sheet, please keep a few things in mind. The mention of specific asset class performance within any publication from R Best, LLC is based on the noted source index (i.e. Newedge CTA Index, S&P 500 Index, etc.), and investors should take care to understand that any index performance is for the constituents of that index only, and does not represent the entire universe of possible investments within that asset class. Further, there can be limitations and biases to indices such as survivorship and self-reporting biases, and instant history.

(4) R Best Private Client Returns are based on trading of customer accounts in the Private Client Program.
